## **Department Mission Statement**

The mission of the Vermont Department of Environmental Conservation is to preserve, enhance, restore, and conserve Vermont's natural resources, and protect human health, for the benefit of this and future generations.

## **Description of Divisions, Appropriations, and Programs**

By statute and through delegation from the Agency of Natural Resources, the Department of Environmental Conservation is charged with protecting public health and the environment. The Department meets this challenge through: (1) limiting the impacts of activities that impact the environment through permits, compliance inspections, and enforcement; (2) delivering financial assistance to communities, citizen groups and businesses; (3) providing public education and technical assistance to communities, citizen groups and businesses; (4) monitoring environmental quality and public health; and (5) protecting and restoring natural resources. The Department strives to treat citizens and businesses fairly, honestly and openly, to provide programs that are efficient and cost-effective, to lead by example, and to make timely decisions.

The Department administers various state and federal programs with responsibility for regulating the discharge or emission of pollutants into the air, water or soil. Many of these programs are administered under the authority of federal law with the approval of the United States Environmental Protection Agency. In this way, the State of Vermont retains a central role in decisions affecting its citizens and is eligible to receive federal funds to implement these programs.

The Department has four appropriations. Three appropriations cover the majority of the Department's work in seven divisions. Descriptions of each division are located below under their appropriation. The fourth appropriation is the Connecticut River Valley Flood Control Compact for Tax Losses.

## **Management and Support Services Appropriation**

### Commissioner's Office

The Commissioner's Office provides leadership, management, business, policy and planning services for all departmental divisions and programs.

### Environmental Assistance Office

The Environmental Assistance Office administers assistance, outreach and recognition programs. The Office provides guidance to permit applicants, environmental compliance assistance to Vermont businesses and municipalities, recognition programs for green businesses, and assistance to municipal household hazardous waste programs. The Office assists businesses, communities, state agencies, and others to identify effective and economical ways to reduce waste at the source in order to avoid waste treatment and disposal costs and to safeguard human health and the environment.

### Vermont Geological Survey

The Vermont Geological Survey conducts mapping, research and provides aid and advice about the state's geology, mineral resources and topography. The Geologic Survey performs bedrock and surficial mapping, applied studies, digital map products, data distribution, and education. Geological information collected, analyzed and disseminated by the Survey plays a significant role in locating groundwater supplies, arranging waste disposal, understanding the movement of contaminants, and addressing natural hazards such as landslides, radioactivity, erosion, and earthquakes. Public service maps derived from the base geology are used to protect public health and safety. The survey also includes the Radioactive Waste Management Program.

### Compliance and Enforcement Division

The Compliance and Enforcement Division is charged with enforcing the laws and regulations administered by the Agency of Natural Resources, primarily for DEC but also for the Department of Forests, Parks and Recreation. The Department of Fish and Wildlife does most of its own enforcement. The division also coordinates with the Agency of Agriculture, Food

and Markets regarding cases involving that agency's jurisdiction. The goal of the Compliance and Enforcement Division is to integrate all compliance and enforcement activities in a manner that protects the environment and public health, ensures the integrity of the Agency's regulatory programs, and ensures an even playing field for all Vermonters. Division activities include civil and criminal investigations, prosecution of administrative enforcement cases before the Environmental Court, and screening and referrals of criminal and civil cases (as appropriate) to the state's attorneys and the Attorney General.

### Administration & Innovation Division

The Administration & Innovation Division encompasses a range of central services functions which serve the entire Department. Those functions include: financial management; operational services including resource allocations (e.g. information technology, personnel, Fleet, records management, procurement, office space and logistics); and Department-wide planning and reporting (e.g. US Environmental Protection Agency Performance Partnership Agreement, strategic planning, and performance measures tracking). In addition, the Department's Business Transformation Initiative is led by this division. This Initiative involves coordination with both internal and external entities as DEC undertakes a system of continuous improvement in our business practices. The goal of the Business Transformation Initiative is to increase our level of service to the Vermont public by, among other improvements, making it easier for businesses, municipalities and citizens to get permits and assistance. A related goal of this effort will be to increase the transparency of the department's work – making information more readily available and accessible.

### **Air and Waste Management Appropriation**

#### Air Quality and Climate Division

The Air Quality and Climate Division administers a statewide program of air pollution prevention, abatement, and control, with the goal of protecting public health and the environment. Additionally, the division has been actively involved at the national level in efforts to document and reduce the impact of out-of-state power plants on public health and the environment in Vermont. The division has been active in the development of a regional climate action plan as well as a "cap and trade" program for carbon dioxide emissions within seven states in the Northeast, known as the Regional Greenhouse Gas Initiative ("RGGI"). The division has been at the forefront of greenhouse gas litigation, and is one of a small number of states that have joined with California in adopting Low Emission Vehicles Rules. The division approaches

the challenges of air quality management through risk assessment and risk management. The Planning and Technical Services Sections identify and assess risk: the Field Services, Engineering Services, and Mobile Source Control Sections implement risk management decisions.

### Waste Management and Prevention Division

Through a combination of assistance, planning, regulation, permitting, and inspections, the Waste Management and Prevention Division oversees the management of solid and hazardous wastes to protect the public health and the environment. Hazardous and solid waste programs are managed to meet Vermont environmental law and regulatory standards and U.S. Environmental Protection Agency standards for the Resource Conservation Recovery Act. This program also implements the State's Materials and Solid Waste Management Plan with a focus on helping Vermont households and businesses find convenient, affordable ways to divert organic material (yard and food waste) and recyclables away from landfills and into economically valuable uses. The division also oversees the investigation and remediation of sites contaminated by hazardous wastes from petroleum, chemical, and industrial release. The Petroleum Clean-up Fund is managed to remediate sites contaminated by petroleum. The Brownfield Program promotes and assists in the clean-up and reuse of contaminated properties. The Underground Storage Tank Program is responsible for overseeing the management of underground storage tanks. In addition, the division maintains a 24-hour Spill Response Team to provide assistance in the control and clean-up of spills.

### **Office of Water Appropriation**

#### Facilities Engineering Division

The Facilities Engineering Division assists in the planning, design, construction and first year operation phases for the new construction or upgrade of municipal and private potable water supply systems (including schools) and municipal wastewater systems. The division also administers the state and federal grant and revolving loan programs that fund this work. It plans and implements the original construction or improvement projects for state-owned dams, and for Fish and Wildlife and Forests, Parks and Recreation projects such as fishing access areas, fish culture stations, and state park facilities. In addition, the division administers the Dam Safety and Hydrology Program, which involves safety inspections of non-power generating dams, and review and permitting for dam alteration or construction projects.

## Watershed Management Division

The Watershed Management Division helps protect surface water quality and quantity for over 800 significant lakes and ponds, 7,000 miles of rivers and streams, and 300,000 acres of wetlands that exist within Vermont. The Division provides regulatory oversight and technical assistance to ensure proper design and construction of stormwater treatment and control practices as well as construction-related erosion prevention and sediment control practices, necessary to minimize the adverse impacts of stormwater runoff to surface waters throughout Vermont. It also administers the federally delegated permitting programs for municipal and industrial wastewater discharges, and the state permitting programs for indirect discharges and residuals management. The Division oversees the wastewater operator certification program.

The Division conducts chemical, physical and biological environmental monitoring and provides guidance to citizen monitoring programs to determine current quality and threats to that quality. It publishes assessments of streams, rivers, lakes and wetlands and prepares watershed plans for each basin through public-private collaborations that work to identify waters that are experiencing difficulties and to develop and implement corrective strategies. The uses these assessments in issuing grants and providing technical assistance for local nonpoint source pollution management activities in lake and river watersheds.

The Division is responsible for identifying and protecting wetlands and the functions and values they provide. Activities to achieve these goals include education and permitting. Similarly, the Division protects lakes and through providing assistance regarding lake management and protection to municipalities, lake associations, and individuals. Finally, the Division protects river systems and floodplains to protect their ecological integrity and recover equilibrium conditions. The Division provides technical and regulatory assistance for projects in river corridor and floodplains to avoid and mitigate flood and erosion hazards, and to increase retention of sediments, nutrients, and riparian habitat. This program also coordinates hydroelectric dam licensing reviews, and assures that stream flows below dams, water withdrawals, and hydropower reservoirs meet minimum standards.

## Groundwater and Drinking Water Protection Division

The Groundwater and Drinking Water Protection Division administers programs responsible for protecting groundwater quality through the regulation of small-scale wastewater systems that discharge to ground-based systems and for protecting drinking water, whether from groundwater or surface water systems.

The Division administers the wastewater system and potable water supply rules from its five regional offices. These rules regulate soil-based wastewater systems and on-site water supplies with a design capacity of less than 6,500 gallons per day as well as all connections to the municipal water and wastewater systems. The program currently covers all single family residences, commercial development, public buildings, mobile home parks, and campgrounds and issues approximately 3,000 permits annually. This division also licenses the designers of the systems it permits.

The Division issues Underground Injection Control permits that regulate the discharge of non-sanitary wastewater into the ground. The Division also issues permits for land-based sewage treatment and disposal systems greater than 6,499 gallons per day, including septic tanks, leachfields, and treatment plants and spray disposal systems.

The Division's drinking water programs are responsible for ensuring that Vermont's 1,400 public water systems provide clean and safe water to their customers. It does this through sanitary surveys, technical assistance, operator certification, compliance tracking for nearly 100 contaminants, a low interest loan program and permitting of all aspects of source water development, construction and operation. The Division oversees the state's groundwater protection and well driller's regulatory programs. The Division also regulates large groundwater withdrawals.

### **Connecticut River Valley Flood Control Compact - Tax Losses Appropriation**

The Connecticut Valley Flood Control Compact appropriation facilitates the management of receipts from Connecticut and Massachusetts for tax losses in Vermont towns where the U.S. Corps of Engineers has built flood control projects.

### **Department Key Budget Issues**

The Department of Environmental Conservation (DEC) FY'16 budget reflects a relatively stable level of general fund demand, managing upward pressures and achieving strategic priorities through a combination of program cuts, efficiency measures, and increases in environmental permit fund revenues realized through the Agency of Natural Resources executive fee proposal. The budget includes a decline of approximately \$343,000 in general fund due mainly to the transfer of our DEC LaRosa Laboratory to the Agency of Agriculture, Food & Markets.

Approximately \$920K of the fee increases being proposed are necessary to maintain the existing level of service in our various DEC program areas in light of increased operating costs and expected budget pressures over the next three year fee period. The DEC is also proposing some new fees and fee modifications which are aimed at enabling the department to meet critical resource needs in order to implement the Department's obligations under the Lake Champlain Total Maximum Daily Load (TMDL) Phase One Implementation Plan. We have developed a set of fee increases totaling \$1.54M to cover the identified staffing and operational needs associated with the Phase One Implementation Plan for FY 2016 which includes 13 new staff positions.

DEC's FY'16 budget will allow the department to meet its obligations to protect Vermont's air, water and soil while providing effective and efficient service to the regulated community and the public.

 Performance Measure Detail

**Appropriation: 6140030250 Environmental Conservation - E-Waste Program**

**Objective:** To provide convenient, year-round collection of covered electronic devices at no-cost to households, charities, school districts and small businesses and paid for by electronic manufactures.

Measures	Unit	FY 14 Targets	FY 14 Actuals	FY 15 Estimate	FY 16 Targets
The pounds of covered electronic devices (computers, monitors, printers, televisions, computer peripherals) per number of Vermont residents. Program Year Oct 1 - Sept 30	# lbs/person	6	7.8	7.4	7.4
The total number of locations that provide collection of covered electronic devices at no charge under the State Standard Program or the Opt-Out Program	# of locations	52	123	52	52
The cost per pound of covered electronics collected under the State Standard Program, includes all costs associated with the collection, transport and recycling of the devices	\$ cents/lb		0.31	0.29	0.29

Program Budget:	FY2014 Actuals	FY2015 Original As Passed Budget	FY2015 Governor's BAA Recommended Budget	FY2016 Governor's Recommended Budget
PE Personal Services	1,625,705	2,315,834	2,315,834	2,212,989
